

Le Professionnel « Sheylus »

Product identification

Name	Le professionnel « SHEYLUS»
Description	Le Professionnel Sheylus, thanks to the process of obtaining O2livotecnia®, it preserves natural antioxidants as well as Omega 6 and 9 present in the oil.
Ingredients	VIRGIN High Oleic Sunflower Oil, Rapeseed and Sunflower refined oil, E900, Tocopherols.

Fabrication process

The process of obtaining O2livotecnia® gives Le Professionnel oil resistance to high temperatures (180°C) thus extending its shelf life.

This process ensures that this oil is one of the most resistant and the most efficient on the market.

Le Professionnel Sheylus generates less fume, unwanted odors and foaming as well.

One of the main strengths of this oil is its high stability, based on the results obtained by the Rancimat AOCS Official Method Cd 12b-92 at 100°C.

Analytical characteristics

Nutritional values	
Calories	900 Kcal
Lipids	100 gr
Saturated fatty acids	8 gr
Monounsaturated fatty acids	72 gr
Polyunsaturated fatty acids	20 gr
Proteins	0 gr
Carbohydrates	0 gr
Fibers	0 gr
Salt	≤ 0,01 gr

Certifications

Le Professionnel

one of the most resistant and the most efficient oils on the market.

Comparative table with existing oils on the market

Time RANCIMAT (Hours)	
Le Professionnel Sheylus	40 H
Standard Vegetable oils	14 H

Instructions for use

Store away from light, humidity and heat.

Recommended for people with celiac disease (gluten intolerance), free of allergens, transgenics, or irradiated compounds.

Conditioning

The product comes in these formats.

Contenance	50 CL	50 L	15 L	20 L
Type	Polyethylene	PET	Bag in Box	Polyethylene
Number of bottles/cardboard	04	04	1	1
Number of cardboard/pallet	50	36	100	48

Physico-chemical characteristics	
Free acidity (% m/m expressed as oleic acid)	≤ 1,0
Peroxide index (in milliequivalents oxygen peroxides per Kg of oil)	≤ 15
Moisture content and volatiles % m/m	≤ 0,2
Insoluble impurity content (%)	≤ 0,05
Metal traces mg/kg	
Iron	3,0
Copper	0,2
